EXPERIENCE

GAME DEVELOPER

2022 – Present

AI INDUSTRIES

Developed and maintained casual and hyper-casual mobile games using Unity (2D & 3D). Implemented core gameplay mechanics including player controls, physics interactions, scoring, and progression systems. Designed and optimized UI/UX flow, ensuring smooth and engaging player experience. Collaborated with a small team of designers and testers to deliver prototypes and production-ready builds. Improved performance and memory management for Android builds, achieving stable 60 FPS on mid-range devices. Assisted in AI-driven features integration such as smart difficulty adjustment and adaptive gameplay.

GAME DESIGNER

2023 – Present

AI INDUSTRIES

visual aesthetics for multiple casual and racing games including Hyper Car, Car, and Cube. Collaborated on UI/UX, in-game assets, and interactive elements to enhance player engagement and retention. Developed game design documents, planned game progression, and balanced difficulty for smooth player experience. Oversaw integration of art, animations, and sound design to ensure cohesive game vision.
